

Health & Safety Policy Statement

Statement of Intent

Narec is fully committed to the health and safety of its employees and others who may be affected by the company's operations.

The company is fully aware of its obligations under current Health & Safety legislation and is fully committed to meeting those obligations.

The company will strive to ensure that the risks of personal injury, ill-health and damage to company assets are reduced to a level which is as low as reasonably practicable.

Organisation

The Chief Executive Officer of Narec is ultimately responsible for the implementation of this policy.

The day-to-day management of health and safety is a line management responsibility and managers and supervisors are held accountable for the implementation of this policy: detailed responsibilities for all employee groups are set out in the Organisation and Responsibilities Policy, PO 2005.

Advice and guidance on Health and Safety matters is provided by the Safety, Health, Environment and Quality Manager.

Arrangements

The successful management of Health and Safety is a key management objective and is achieved through the development and implementation of a formal Health and Safety Management System: the system is described in detail in the Health and Safety Manual, ID 2000

The company is committed to continuous improvement of the system with key improvement objectives being identified annually as part of the Management Review process.

Narec will seek certification to OHSAS 18001 to cover all of its business activities.

This policy statement will be made available to all staff and will be reviewed on an annual basis.
